IFRS 17

- The Group's IFRS 17 implementation programme was launched in 2017, beginning with an initial phase devoted to determining the project budget, structuring the project approach and assessing the financial impacts for the Group.
- The implementation work, which was launched in 2018, is organised around several sub-projects addressing the programme's various challenges (accounting and actuarial methods, actuarial models, accounting, consolidation, processes, etc.) All the affected functions (actuarial, accounting, management control, IT, etc.) are taking part in the project.
- In November, the IASB voted to defer application of IFRS 17 and IFRS 9 by insurance companies and established a new timeline for their application. IFRS 17 will be applicable by CNP Assurances as from the accounting period beginning on 1 January 2022, and the Group will also be required to prepare pro forma financial statements in 2021. The deferred application date has no impact on the programme roadmap. The teams will remain fully engaged and use the additional year to conduct tests.
- The Group intends to pursue its lobbying and consultation activities until the standard is adopted by the European Commission.
