Glossary

This glossary includes definitions of alternative performance measures (APMs) that are considered useful by CNP Assurances to measure and analyse the Group's performance. The APM reporting scope has been modified compared to previous periods, with the introduction of a new indicator of attributable recurring profit. All APMs are identified by an asterisk (*). They should be treated as additional information and not as substitutes for the balance sheet and income statement prepared in accordance with IFRS.

They may not be comparable with those published by other companies, as their definition may vary from one company to another. Prudential measures determined in accordance with the Solvency II Directive, and actuarial measures determined in accordance with European Insurance CFO Forum Market Consistent Embedded Value© Principles are not considered to be APMs.

This technique strips out the effect of acquisitions and divestments from the change in the indicator concerned.
